# IT Portal

- Born in March 2006, for the caENTI
- 2007 (Huelva): new version, about the Territorial Intelligence concept
- 1500 articles published in 3 years (all headlines)
- 3 languages:
  - in English:  
<http://www.territorial-intelligence.eu>
  - in French:  
<http://www.intelligence-territoriale.eu>
  - in Spanish:  
<http://www.inteligencia-territorial.eu>

The screenshot displays the homepage of the Territorial-Intelligence.eu portal. At the top, there is a navigation bar with links for 'About this portal', 'Site map', 'The cloud', 'RSS feed', 'Conferences', 'Intra-consultation', and 'Catalyse Community'. The main header features the site title 'Territorial-Intelligence.eu' and the tagline 'Knowledge, methods, governance and tools for action'. Below the header, there are several content blocks: a 'Learn more' section with links to 'State of the art of territorial intelligence' and 'Comparative research activities'; an 'EDITORIAL' section by Jean-Jacques GIRARDOT titled 'The prospects of the European network of territorial intelligence'; a 'Focus' section on 'Catalyse method: tools of diagnosis, evaluation and observation accessible to the local actors of the sustainable territorial development'; and a 'Coordination Action of the European Network of Territorial Intelligence (caENTI)' section. The right sidebar contains 'Latest news' with several headlines and an 'Events on calendar' section. The footer includes logos for caENTI, the European Commission, and various partner organizations like UFC, TnoMa, and Proxima-Grand.

# IT Portal organization

- Place of reference and reflection on the concept of territorial intelligence.
- 7 headlines:

The screenshot shows the header and navigation menu of the Territorial-Intelligence.eu website. At the top left, there are language selection buttons for English (En), French (Fr), and Spanish (Es). To the right, a horizontal menu contains links for 'About this portal', 'Site map', 'Tag cloud', 'RSS feed', 'CooSpace', 'Intra-consortium', and 'Catalyse Community'. Below this is a green banner with the website's logo on the left, which consists of stylized human figures holding hands. The main title 'Territorial-Intelligence.eu' is displayed in large white letters, followed by the tagline 'knowledge, methods, governance and tools for action' in smaller white text. To the right of the logo is the CAENTI logo, which includes a colorful network diagram and the text 'CAENTI A project funded under FP6 of the E.U.'. Next to it is the European Union flag and a search bar with a 'Search' button. At the bottom of the banner, a navigation menu lists: 'What's new?', 'Projects', 'Ongoing research', 'Scientific events', 'Publications', 'Formations', and 'Tools and links'. The background of the banner features a faint pattern of stars and stylized human figures.

### caENTI Quality Letter of Action-Research favouring Territorial Governance of Sustainable Development (D47)

By Blanca MIEDES-UGARTE (WPS Leader, Huelva University - UHU) | December 2007 | caENTI deliverable 47

This deliverable gathers together the results of the scientific coordination of universities and territorial actors which are members of caENTI within the framework of WPS "Analysis of the application of the governance principles of sustainable development to territorial action-research" during the period from March 2007 to February 2008.

WPS's main task for this phase of the project has been joint reflection on the main aspects that have influenced improvement of the quality of action-research processes, so that its processes and results favour, to the largest extent, the objectives of sustainable development by promoting territorial governance.

The conclusions of the analysis of the participants' experiences in territorial action-research projects, which was carried out in the previous stage and gathered together in [Deliverable 40 of CAENTI: Analysis of the Application of the Governance Principles of Sustainable Development to Territorial Action-Research](#), have been taken as the starting point for this reflection.

**Assessing action-research quality**

This tool is a template for the evaluation of the quality of participative processes in the framework of Action-Research projects.

The caENTI letter of quality of action-research favouring territorial governance of sustainable development by the caENTI Workpackage 5 and presented during the second annual international conference of territorial intelligence held in Huelva (24-27 October 2007), suggested that the key factor for the quality evaluation of an action-research process of is the quality of the participative process between researchers and actors.

**Catalyse Toolkit**

To make tools that are accessible and useful for actors, Catalyse adapts fundamental methods and generic tools of wide-applicability.

They are methods of statistical and spatial analysis of data, management and evaluation protocols, knowledge bases, systems of scientific and technical edition, geographical information systems that use the information and

communication technologies.

The harmonization of the European Catalyse observatories is made in the caENTI framework.

Catalyse especially uses the friendly software that are designed for the researchers in humanities and in social sciences and that were made by the [ThéMA research team in Territorial Intelligence](#).

**Focus**

**Catalyse method: tools of diagnosis, evaluation and observation accessible to the local actors of the sustainable territorial development**

The Catalyse method offers tools of diagnosis, evaluation and observation that are accessible to the local actors of the sustainable territorial development. These tools are useful to draft relevant development projects, to efficiently manage these projects, then to evaluate them and to estimate their impact.

These tools that are intended for the actors of the sustainable development respect and favour the principles of

participation, global approach and partnership. They facilitate the mobilization of development partnerships that are composed of professionals who work in public services, private organizations and active volunteers in associations. They guarantee a participative animation of the partnership.

**Catalyse Community**

- Download
- Documentation
- Demonstration

**About caENTI objective**

Conception and dissemination of methods and tools of territorial intelligence accessible for the territorial actors and respectful of a sustainable development ethics (WPI).

**Direct access**

- [Intra-consortium](#)
- [CeoSpace](#)
- [Catalyse](#)
- [Action-Research Quality](#)
- [Catalyse Community](#)

**Project**

**Web mapping for territorial indicators**

Geographical information systems (GIS) are becoming a common tool in applications that involve spatial data. In the last years the internet technology is moving GIS towards web based applications, simplifying the interaction between users and GIS, and at the same time reducing the ownership and maintenance costs.

In the framework of caENTI ([Communication Action of the European Network of Territorial Intelligence](#)) we are developing a web mapping solution to present selected socio-economic indicators of European Union in the form of interactive map.

# Catalyse Community

The screenshot shows the Catalyse Community website. At the top, there is a navigation menu with links: Home, About Catalyse, Pragma, Anaconda, Download, Documentation, and Demonstration. Below the menu is a green header banner with the text "Catalyse Community" and "Tools of diagnosis, evaluation and observation". To the right of the banner, it says "Designed in the framework of caENTI" and "Funded under FP6 of the E.U.", accompanied by logos for caENTI, CITIZENS AND GOVERNANCE IN A KNOWLEDGE-BASED SOCIETY, the European Commission, and a RSS feed icon.

The main content area is divided into several sections:

- About Catalyse:** A date stamp "Mar 24 2008" is on the left. The text describes the tools as accessible and useful for actors, adapted from fundamental methods. It mentions statistical and spatial analysis, management, and evaluation protocols. It also notes that Catalyse uses friendly software designed for researchers in humanities and social sciences, specifically mentioning the [TheMA research team in Territorial Intelligence](#). A note states that the harmonization of European Catalyse observatories is made in the [caENTI framework \(www.territorial-intelligence.eu/caenti\)](#).
- Learn more:** A list of bullet points:
  - Specifications for the "PRAGMA" data collection and quantitative treatment software
  - Conceptual and methodological specifications for a Territorial Information Community System, including technical specifications for integration of "PRAGMA" with the software of qualitative data analysis "ANACONDA" and "HUAGE"
- Language:** Options for Spanish and French.
- Welcome Eddy Petit:** A list of links: Dashboard, Profile, Logout.
